

大麻是否可作藥用？

Can **cannabis** be used as a medicine?

- 大麻植物不是藥物。

The cannabis plant is not a medicine.

- 個別大麻素或可紓緩某些嚴重痛症和藥物副作用，部分國家（例如美國）有批准含大麻素的藥物供臨床使用，以處理某些嚴重病症（例如癌症）。

Individual cannabinoids may relieve certain serious pains and side effects of medicines. Some countries (e.g. the US) permit the clinical use of medicines containing cannabinoids for handling serious illnesses (e.g. cancer).

- 有關研究仍在進行。

Relevant researches are being undertaken.

**在香港，大麻及四氫大麻酚
均屬受《危險藥物條例》
(第 134 章) 管制的危險藥物。**

**In Hong Kong, cannabis and
THC are both dangerous drugs
controlled under the Dangerous
Drugs Ordinance (Cap. 134).**
