

4 二零零六年首次被呈報及曾被呈報濫用藥物者的特徵 Characteristics of Newly and Previously Reported Drug Abusers in 2006

4.1 在二零零六年所有被呈報的 13 204 名濫用藥物者中，3 482 人或 26.4% 是首次被呈報，餘下 9 722 人 (73.6%) 則曾經被呈報。在廿一歲以下濫用藥物青少年當中，首次被呈報人士的百分比為 68.5%，遠高於在廿一歲及以上年長濫藥者的 16.3%。現於下文比較首次被呈報及曾被呈報濫藥者的特徵。

年齡和性別 (表 2a)

4.2 首次被呈報濫用藥物者和曾被呈報濫用藥物者的年齡分布頗為不同，前者近乎有四分之三 (72.0%) 的年齡介乎 16 至 30 歲，後者則有約四分之三 (72.2%) 的年齡介乎 21 至 50 歲。首次被呈報濫用藥物者的平均年齡為 23 歲，相較於平均年齡為 38 歲的曾被呈報濫用藥物者一般年輕很多。

4.1 Of all 13 204 drug abusers reported in 2006, 3 482 or 26.4% were reported for the first time in the year (or newly reported) and the remaining 9 722 (73.6%) were previously reported. The respective proportion among young drug abusers under 21 was much higher, at 68.5%, as compared against 16.3% among adult abusers aged 21 and over. A comparison of the characteristics between newly and previously reported drug abusers is given in the ensuing paragraphs.

Age and Sex (Table 2a)

4.2 The age distribution of newly reported drug abusers was quite different from that of previously reported ones. Nearly three quarters (72.0%) of the former were aged 16-30, whereas about three quarters (72.2%) of the latter were aged 21-50. Newly reported drug abusers, with an average age of 23, were in general much younger than their previously reported counterparts (with an average age of 38).

Chart 4.1 Newly/previously reported drug abusers in 2006 by age

4.3 在性別分布方面，女性佔首次被呈報濫用藥物者31.8%，但在曾被呈報濫用藥物者中所佔的百分比則較低，只有14.7%。

4.3 Regarding the sex distribution, 31.8% of newly reported drug abusers were females, while the respective proportion among previously reported abusers was lower, at 14.7%.

被濫用的藥物種類 (表 2b)

Type of Drugs Abused (Table 2b)

4.4 在二零零六年首次被呈報濫用藥物者中，最常被濫用的藥物種類為“K仔”(54.7%)，其次為“搖頭丸”(26.0%)、海洛英(20.5%)和大麻(15.4%)。

4.4 Among newly reported drug abusers in 2006, the most commonly abused type of drugs was ketamine (54.7%), followed by ecstasy (26.0%), heroin (20.5%) and cannabis (15.4%).

4.5 在曾被呈報的濫用藥物者中，最多人濫用的藥物種類是海洛英(76.4%)。其他藥物類別的濫藥人數較少，主要為“白瓜子”/“藍精靈”(21.6%)、“K仔”(12.0%)和“冰”(5.7%)。

4.5 Among previously reported drug abusers, heroin was the dominant type of drugs abused (76.4%). A smaller proportion of abusers was recorded for other kinds of drugs, mainly triazolam/midazolam/zopiclone (21.6%), ketamine (12.0%) and ice (5.7%).

現時濫用藥物原因 (表2c)

4.6 首次被呈報的濫用藥物者現時濫用藥物的三個最主要原因，分別是“受到同輩朋友影響”(53.4%)、“出於好奇”(46.5%)和“解悶”(34.2%)。

4.7 至於曾被呈報的人士，現時濫用藥物的三個最主要原因分別是“受到同輩朋友影響”(46.0%)、“避免因沒有服食藥物而感到不適”(45.7%)和“解悶”(41.9%)。

首次濫用藥物的年齡 (表2d)

4.8 曾被呈報的濫用藥物者較早開始濫用藥物，平均在17歲開始，而首次被呈報的人士則較遲開始濫用藥物，平均在20歲開始。

活動狀況 (表2e)

4.9 在首次被呈報的濫用藥物者中，有38.8%是失業人士，37.7%全職工作人士，13.7%是學生，6.4%是散工/兼職工作人士。在曾被呈報的人士中，失業人士的比例高很多，達57.1%，另28.7%是全職工作人士，7.9%是散工/兼職工作人士。

教育水平 (表2f)

4.10 在首次被呈報濫用藥物者當中，具有較高教育水平的比例較大，有53.5%曾接受初中教育，29.7%高中教育，2.1%專上教育及14.2%小學教育，只有0.4%從沒接受教育或只有

Reason for Current Drug Abuse (Table 2c)

4.6 For newly reported drug abusers, the three most popular reasons for current drug use were “peer influence” (53.4%), “curiosity” (46.5%) and “relief of boredom” (34.2%).

4.7 As for previously reported persons, the three most popular reasons for current drug use were “peer influence” (46.0%), “avoid discomfort of its absence” (45.7%) and “relief of boredom” (41.9%).

Age of First Abuse (Table 2d)

4.8 Previously reported drug abusers on average started to abuse drugs at an earlier age, at 17, while those newly reported persons later, at 20.

Activity Status (Table 2e)

4.9 Of all newly reported drug abusers, 38.8% were unemployed, 37.7% full-time workers, 13.7% students and 6.4% casual/part-time workers. Among previously reported persons, the proportion of the unemployed was much higher, at 57.1%. Some 28.7% were full-time workers and 7.9% casual/part-time workers.

Educational Attainment (Table 2f)

4.10 A greater proportion of newly reported drug abusers attained higher educational level, with 53.5% being lower secondary, 29.7% upper secondary, 2.1% tertiary education and 14.2% primary

幼稚園的教育水平。

4.11 至於曾被呈報的人士，有 31.7% 曾接受小學教育，50.9% 初中教育，14.6% 高中教育，0.6% 專上教育及 2.2% 從沒接受教育或只有幼稚園教育水平。

婚姻狀況 (表 2g)

4.12 在首次被呈報的濫藥者中，有 84.7% 從未結婚，而曾被呈報的人士中則有較少比例從未結婚，為 51.6%。已婚和與人同居的人士一共分別佔前者的 12.4% 和後者的 35.1%，而喪偶、已離婚或分居的人士則合共分別佔前者的 3.0% 和後者的 13.3%。

4.13 在已婚或與人同居的首次被呈報人士中，有 19.4% 報稱其伴侶亦濫用藥物，與曾被呈報人士的情況類似，後者相關的比例為 12.1%。在首次被呈報和曾被呈報的男性濫藥者中，有濫藥伴侶的比例相若(分別為 13.3% 及 7.8%)；而首次被呈報女性濫藥者相關的比例(29.0%) 則較曾被呈報者的為低(40.9%)。

education. Only 0.4% had no schooling or at kindergarten level.

4.11 For previously reported persons, 31.7% had primary education, 50.9% lower secondary, 14.6% upper secondary, 0.6% tertiary education and 2.2% no schooling or kindergarten.

Marital Status (Table 2g)

4.12 Some 84.7% of newly reported drug abusers were never married while the respective proportion among previously reported persons was lower, at 51.6%. Married and cohabiting persons took up 12.4% of the former group and 35.1% of the latter group, while the widowed, divorced or separated altogether took up 3.0% of the former group and 13.3% of the latter group.

4.13 Of those married or cohabiting newly reported persons, 19.4% reported that their partners also abused drugs, which was similar to 12.1% for the previously reported counterparts. Among males, the respective proportions among both newly reported and previously reported drug abusers were similar (at 13.3% and 7.8% respectively). For females, the respective proportion was lower among newly reported persons (at 29.0%) than that among the previously reported ones (at 40.9%).
